Summary

Infrastructure and Security Engineer with 5+ years of experience designing, deploying, and administering mission-critical server and storage environments securely. Proven expertise in VMware vSphere, Windows Server, Microsoft 365, and Azure, with hands-on experience in Druva and Veeam Backup, ITIL-aligned change and incident management, disaster recovery, and security operations including vulnerability management, IDS/IPS, and access governance.

Technical Skills

Platforms:	VMware vSphere, PrivX, XEN, Azure AD, AWS, Docker, GCP
Backup/Storage:	Druva, Veeam, NetApp, Cohesity, disaster recovery planning
Monitoring:	Zabbix, Wazuh, ServiceNow, SIEM, IDS/IPS
Scripting:	PowerShell, Python, Bash, Ansible, Rewst, SQL Server, MongoDB, MySQL

Experience

Network & Systems Administrator **Contract**
Integrated Building Services Inc. *Toronto, ON*

- Installed, configured, and administered network hardware, hypervisors (**VMware**, **XEN**), and firewalls, including deploying **SIEM, IDS/IPS, and IPtables** controls that improved threat detection coverage by **82%**; monitored network performance and error logs to secure the environment.
- Developed PowerShell and Bash automation scripts **eliminating 8+ hours/week** of manual operational tasks; deployed **SIEM-based monitoring and IDS/IPS** controls, improving threat detection coverage by **82%**.
- Administered **SQL Server, MongoDB, and MySQL** databases; troubleshot complex hardware, OS, and application issues using structured RCA in collaboration with vendor partners and internal IT teams.

IT Infrastructure & Systems Specialist **12/2025 – 06/2026**
ACT360 *Toronto, ON*

- Administered Windows Server environments and core network services (DNS, DHCP, VPN, Active Directory), managing the full hardware lifecycle from procurement through decommission across production infrastructure.
- Authored and maintained **DR runbooks, Ansible playbooks, change records, and audit-ready service documentation**, improving knowledge sharing and reducing mean-time-to-resolve incidents
- Performed structured **root cause analysis** on escalation-level L1/L2 incidents; corrective actions eliminated repeat failures across 3 recurring issue categories, reducing ticket volume by 12%.
- Delivered end-user training and orientation for all modified and new systems; developed automation scripts with **Rewst** to streamline routine operations and reduce manual workload.

Security Specialist **06/2024 – 12/2025**
Advantage Group International *Toronto, ON*

- Managed **VMWare VSphere version 8** for most virtualization and server management along with **Microsoft 365** tenant (Exchange Online, SharePoint, Teams) and **Azure** IaaS workloads; conducted capacity planning and cost-benefit analysis that reduced cloud infrastructure spend by **18%**.
- Drove **SOC 2** readiness across the organization; documented and validated controls mapped to Trust Service Criteria and **GDPR** requirements as part of the Security, Privacy and Compliance Team.
- Deployed **PrivX / Azure PIM** for just-in-time privileged access and authored ITIL-aligned change and incident management procedures adopted across the organization, significantly strengthening access governance.
- Built custom infrastructure performance and health dashboards tracking uptime, usage SLA compliance, and resource utilization through use of **Zabbix**. Delivering executive-level reporting on system health.
- Conducted in-depth vulnerability assessments and collaborated with IT teams to remediate findings, perform root-cause analysis, and implement prevention strategies using **Wazuh (SIEM/XDR)** and **SentinelOne**.

Full Stack Developer **Contract 3/2022 – 7/2022**
El-Mae-Dan Technologies Inc *Toronto, ON*

- Created a reliable and scalable game used by over **15000 users**. Ensuring a smooth experience on platforms such as Apple, Android, and Html through use of **WebGL**.
- Led backend infrastructure development for real-time storage systems leveraging **SQL & Firestore**, enhancing data processing efficiency by **60%**.
- Managed the technical aspects of the project, ensuring timely delivery and efficient execution of all phases, from initial planning to deployment and post-implementation support.

Education

University of Guelph
Bachelor of Computing – Computer Science *Guelph, ON*

Certifications

Security+ | *CompTIA* **In Progress**
Practical Junior Penetration Tester (PJPT) | *TCM Security* **2026**
